Service and Winterization

What is mobile small engine maintenance at DH Lawn & Garden Equipment

DH Lawn & Garden Equipment of Topeka is the practice of regularly inspecting, servicing, and repairing motorized equipment that uses a small engine.

This type of equipment can include lawn mowers, snow blowers, leaf blowers, chain saws, generators, pressure washers and more. Mobile small engine maintenance should be done on a regular basis to ensure safe operation and to keep the machine running efficiently for years to come near me Topeka Kansas.

Winterizing lawn equipment is an essential task that helps to protect your equipment from the harsh winter weather and ensure that it is ready to use when spring arrives. Proper winterization can help prevent damage to your lawn mower, snow blower, or other outdoor power equipment, and extend their lifespan.

[Winterizing a lawn mower involves several steps, including cleaning the undercarriage, changing the oil, and storing it properly](#) . It is important to clean the undercarriage to remove any dirt and debris that may have accumulated during the summer months. Changing the oil is also crucial to prevent internal engine components from corroding over the winter. Finally, storing the lawn mower properly is essential to ensure that it is ready to use when spring arrives.

[Lawn mowers and other outdoor power equipment such as snow blowers, trimmers, and aerators also require winterization recommends wiping down your spreaders, dethatchers, and aerators, restringing trimmers, and making sure your irrigation system is ready for the warm weather](#) .

[Addressing the fuel, changing the oil, and installing new spark plugs when winterizing lawn equipment](#) .

Proper winterization of lawn equipment can help prevent costly repairs and ensure that your equipment is ready to use when you need it.
